To Our Valued Customers;

Subject: REACH Compliance Regulation (EC) No. 1907/2006

Dear Valued Customer,

In 2006, the EU passed the above reference regulation, known as REACH, concerning the production and use of chemical substances. Under REACH, all companies manufacturing or importing chemical substances into the European Union in quantities of one ton or more need to register the substances. It was effective June 2007 with a phased in implementation through June 2018.

In communication with our vendors, we have been advised that the products they supply to us do not contain any significant amounts of chemical compounds referenced on the List of Substances of Very High Concern (SVHC) through its latest release on 3/10/2019.

Thus, as of the date on this statement, we believe the material supplied to you from Siri is in full compliance with this regulation. We will continue to monitor and update the REACH requirements in conjunction with our vendors.

Sincerely,
James Craig/QM
